SUBJECT INDEX

Activated sludge process, aeration in, 323
  model for, 125
  reactor for, 911
Aeration, control of oxygen supply, 619
  effect of additives, 663
  effect of surface-active agents, 529
Aeration equipment, suction impellers, 323
Agitation, in tissue culture, 409
Algae, cultivation, 779
Amyloglucosidase, immobilized, 337
Antibiotics, etamycin, 371
  phosphorus-containing, 399
Antibiotic production, gramicidin, 843
Bacteriophage, RNA, 257
Biological waste treatment processes, 113, 125, 449
Catalysis, multiphase, 431
Cell disruption, 549
Cellulose utilization, 77, 99
Chemostat, control of culture mass, 335
  ethanol inhibition in, 293
Chromatography, gas, 453
Continuous cultivation, 63, 335, 451, 657, 815
  equipment for, 877
  gramicidin production, 843
  large scale, 457
  temperature relationships in, 795
  wall growth in, 919
Electrophoresis, 17
Enzymes, immobilized, 309, 319, 337, 393, 589, 629, 709, 893
  kinetics, 493, 691
  release by cell disruption, 549
  salting out, 713
  storage, 589
Equipment, continuous flow respirometer, 721
  cyclone column culture vessel, 865
  for continuous phased culture, 877
  for controlled oxygen supply, 619
  for pressurized fermentation, 703
  inoculation and sampling, 157
  large scale tissue culture, 457
Ergot alkaloids, media for production, 331
Etamycin, 371
Extraction of fermentation products, 151
Fibers, protein, 147
Filters, membrane, sterilization of, 591
Glucoamylase, immobilized, 309
Glucose oxidase, immobilized, 629
Gramicidin production, 843
Guanine nucleotides, production of, 229
Hydrocarbons, uptake mechanisms, 215, 691
Hydrocarbon fermentations, growth models, 241, 761
  kinetics, 741
  oil-continuous, 825
Hydrocarbon–water systems, drop sizes, 685
Hydroxybutyric acid, preparation, 203
Inhibition, ethanol, 293
  in enzyme catalysis, 493
Invertase, kinetics, 641
Isobutyric acid, 203
Kinetics, enzyme, 493, 691
  fermentation, 99
  growth, 241, 741, 761
  sucrose inversion, 641
  sulfite oxidation, 353
Lysine production, 419
Methane, microbial protein from, 49

Methanol, yeast growth on, 923
Microbial protein, 49, 923
Microbial protein fibers, 147
Mixed cultures, 113
Models, activated sludge process, 125
  continuous culture, 451, 843
  enzyme kinetics, 697
  growth, 241, 257, 761
  sucrose inversion, 641
NAD(H), immobilized, 393
Nutrients, mineral, 517
Oxygen, effects on yeast metabolism, 1, 63, 169
  requirements for cell production, 581
Oxygen electrodes, 599
Oxygen transfer, effects of additives, 663
  effects of surface-active agents, 529
  in microbial slimes, 569
  in mold pellets, 583
  mechanisms, 271
  measurement, 599
pH, control, 381
  effects in tissue culture, 471
Reactors, activated sludge, 911
  for immobilized enzymes, 337
  ultrafiltration, 319
Respiration, measurement, 599, 721
Scale-up, lysine production, 419
Slimes, oxygen transfer in, 569
Starch conversion, enzymatic, 309
Sterilization, membrane filters, 591
Steroids, analysis, 561
  microbial transformations, 503, 561
Steroid esterase, immobilized, 709
Sucrose inversion, kinetics, 641
Sulfite oxidation, kinetics, 353
Sulfur bacteria, growth of, 517
Synchronous culture, 657, 865
Temperature, effects in continuous culture, 795
Tissue culture, HeLa cells, pH effects, 457
  shear effects, 409
Ultrafiltration, 185
Ultrafiltration reactor, for enzymes, 319
Wall growth, in continuous culture, 919
Xanthan production, 381
Yeast, bakers, disruption, 549
  effects of glucose and oxygen on metabolism, 1, 63, 169
  growth on methanol, 923
